

Amsterdam April 10, 2021 – The Pediatrics departments of 60 international hospitals have been using the DollsVilla by Liliane® professionally since 2017, such as the Astrid Lindgrens Children’s Hospital Stockholm Sweden, the Hospital for Sick Kids Toronto Canada, the Royal Rehab Centre Sydney Australia.

### DollsVilla by Liliane®

The gender-neutral DollsVilla on wheels quickly finds a connection with children, because it is a nice, safe place for their "own children", dolls of 30 cm. Cars, horses and bicycles can reach the house via a ramp. The villa at child height, unique in the world, is made of durable, design materials: plywood birch, solid beech, stainless steel and plexiglass. The choice was made for a design in calm, natural tones.

Maastricht University Medical Center MUMC+ | Prof. Dr. Jim van Os, Head of the Department Psychiatry: “The departments Psychiatry and Psychology uses the DollsVilla by Liliane® for the observation of the child and the parent – child interaction. And for the processing of hospitalization and any traumatic experiences which are related to the hospital.”

### Added value of the DollsVilla in healthcare

- To observe children in their own world | words
- To communicate with children, including those with visual or hearing impairment
- To elicit spontaneous speech
- To encourage contact with peers and doctors
- For therapeutic play
- Handy format for multiple and | or physically limited kids – rehabilitation
- To prepare children for surgery and recovery – roleplay
- To stimulate the social-emotional development
- To relax during a medical consultation
- To observe the parent – child interaction
- To support diagnostics and treatment
- To stimulate group play
- For the processing of hospitalization and traumatic experiences related to the hospital
- For happy, joyful play.

DollsVilla by Liliane® to house their most important emotions.
